

DT²⁺

REVOLUTIONIZING SKIN RESURFACING AGAIN

Continuing the evolution of skin resurfacing, Altair Instruments is proud to introduce **DT²⁺** the next generation crystal free skin rejuvenation system. Utilizing the **HydroPlus+** technique combines dry exfoliation followed by serum infusion to create the most effective and powerful skin rejuvenation treatment available today.

From the makers of the original DiamondTome™ and Hydro® Wands presents the dual port, built-in wand holder and handle console. It's convenient, easy to use, portable and quiet. Using a state of the art digital screen, determining vacuum pressure is precise, accurate and quick.

The DT²⁺ Skin Resurfacing System using the patented DiamondTome™ and Hydro Wand® can reduce the effects of aging on your skin in a safe, therapeutic approach to superior skin care results. Skin will be radiant, supple and renewed.

Trusted for innovation, quality and design the new DT²⁺ delivers.
